Patrons of Industry.

Grand Association Meeting in Brandon.

One of the largest delegate gatherings ever held in connection with the Patrons of Industry of the Province of Manitoba, assembled in the McDiarmid Hall Brandon, on Tuesday afternoon at a meeting of the Grand Association. The Grand Executive was represented by Messrs. Charles Bonfield, Grand President, who occupied the chair, James Burdall, Grand Vice-President, H. C. Clay, Grand Secretary-Treasurer pro tem, W. M. Creighton, J. W. Curtis, and J. H. Martin, Grand Trustees, Geo. Marshall, Grand Guide, and J. A. McConachie, Grand Sentinel; and the following is a list of the delegates present with the Subordinate Associations represented by them:

Messrs. M. Kennedy, Star of Hope; J. J. Stubb, Martin; James Crawford, Salsbury; L. Eamon, Norman; W. C. Graham, West Prospect; James Whimster, Bell Plain; E. H. Carter, Euclid; Jas. Mc Gillivray, Minnedosa; A. E. Gaudy, B. Baxter, Eden; J. Fyfe, Shovel Lake; J. Little, Myrtle; J. McKelvey, Squib Creek; J. Wellaby, Glenburnie; A. Thompson, Norfolk; N. Boyne, McBride; Arch. Landry, Oak Grove; F. Hoffman, Gordon; R. J. Taggart, Lily; F. Fenwick, Carrollton; A. Hamilton, Glanton; Wm. Chapman, Harrow; H. J. Burnett, Progress; J. Clarke, Rose; Jas. Bird, Rosedale; Jas. A. Vanharicourt, Glenholm; M. G. Morrison, East Prospect; H. A. Campbell, Minnedosa County; J. Forsyth, Beautiful Plains County; A. E. Hurley, Chatter; C. J. Green, Sturton, etc.

From the report presented by the Grand Secretary it appears the organization was in a most flourishing condition, there being 100 Subordinate Associations connected with it, and others forming in different parts of the Province. A telegram was received from the Cordage Co. of Winnipeg, asking the convention to secure representative to address them on the binding time question, and this was acceded to. Mr. Nicholl attended as representing several Patrons of Industry Lodges formed in the N. W. Territories, which were granted affiliation by the convention. The Grand President delivered an able address in which he reviewed vital questions affecting the farming interest in Manitoba. He pointed out how in the matter of machinery, implements and binding time coming from the States the unequal and heavy duties levied were almost prohibitory; advocated farmers possessing their own grain mills as well as elevators, and urged that the Government should do something in the way of establishing banks where farmers could secure loans at a reasonable rate of interest. He also showed it would be greatly to the advantage of farmers who shipped grain by the car to Port Arthur that they should have their own agent stationed there to look after it. As the evening session a scheme was laid before the delegates for the establishment of a journal published directly in the interest of the Patrons of Industry. As this was based upon an increase of the membership dues, it gave rise to considerable discussion and was ultimately referred to committee.

At Wednesday's session, amongst other business transacted by the convention, the executive was empowered to present upon the attention of the Government the right of the farming community to an equal representation on the Board of Grain Examiners. A resolution in favor of the establishment where practicable of elevators and mills in the farmers' interest was also passed, the Grand President pointing out that when the farmer's elevator at Portage la Prairie had to shut down in consequence of being full, the price of wheat went down in a few hours.

The executive were requested to correspond with various firms for the supply of agricultural implements to the Patrons at a cheaper rate, and to make arrangements with some cord manufacturer for the supply of all the binding twine required by the Patrons throughout the Province next season, on a cash basis. It was also resolved to circulate throughout the subordinate association on a petition to the Government to repeal the duty on imported twine.

The Association also, in the course of their proceedings, voted their festive greetings to the Grand Association of Ontario now sitting and resolved to support them in their endeavour to obtain a charter for the whole of the Dominion. During the interval for luncheon the delegates, at the invitation of Messrs. J. D. McCreight & Co., went up to their stables and inspected their fine stock of imported horses, which were trotted round for their view, and afterwards an expression of appreciation of the enterprise of the firm and of thanks to them for their courtesy was passed. The delegates then, wearing their badges, walked in procession to the place of meeting.

The election of officers came off this evening. Mr. Chas. Bonfield was unanimously re-elected Grand President and Mr. Jas. Burdall was likewise re-

lected Vice-President. Mr. W. Graham of Portage la Prairie, was chosen Grand Secretary, Mr. J. Forsyth, G. Guide, Mr. J. Croten, G. Sentinel, and Mr. Thompson G. Trustee, in place of Mr. Curtis.

On Thursday, the Convention having on the previous night heard Mr. Haggart, of the Winnipeg Cordage Co., on the subject of the supply of binding twine and Patrons taking shares in that undertaking authorized the delegates to lay the matter before their respective associations asking them to co-operate by subscribing personally to the stock of the Company, the object of the proviso being to see whether sufficient shares were likely when taken as would give farmers a controlling influence in the concern.

Steps were taken for the establishment of an official journal by the Association. A resolution in favor of a law prohibiting the manufacture and sale of intoxicating liquors was passed; but on requesting the Provincial Government to aid settlers in securing a water supply in localities where it was deficient, negated. The city of Brandon was again selected for the annual meeting next year.

The Farmers' Institute.

The regular meeting of the Institute was held last Saturday afternoon. Mr. Nicholl, in the absence of President S. A. Bedford, took the chair.

After the meeting was opened in due form the secretary read the minutes of last meeting, which was justly approved of.

A communication was read from J. W. Bartlett, re date for holding an Institute meeting in the city say some time in June next.

Also from Department of Agriculture re interchange of seed.

Moved by secretary Leech seconded by Mr. Wilson that the date for holding said meeting be held in Brandon the time of the Annual Summer fair.—Carried.

Mr. Richard Waugh, of Winnipeg, then read his paper on "Cultivating with a view to early ripening of wheat and preventing the effects of frost", which was very interesting.

He claimed that by more practical experiments in tilling the ground, namely, to get the ground consolidated and use more stable manure, in the hands of cultivators where old and experienced farmers had tried it with the most satisfactory results.

He said that to obtain good results from wheat, the ground should be plowed and harrowed in the fall and another important feature was to sow good, well matured wheat.

Many other experienced farmers spoke in harmony with Mr. Waugh's ideas as regards having the ground well consolidated before applying the seed.

Mr. Wilson, an experienced farmer of the West, then read his paper, which was listened to with eager attention, and many corroborated their methods of preparing soil with a view to early ripening. He said the trouble here was, that it was too easy to grow wheat, therefore farmers neglected to give the ground proper treatment.

Mr. Reid then gave his experience in wheat growing and his modes in preparing the soil. He made many valuable suggestions as how to make mixed farming pay. He also advised more strongly the necessity of getting good matured grain, and with this, together with skillful farming wheat growing could be made a success.

Mr. J. E. Smith spoke along the same line, and thought that by plowing, using cut-away harrows well, so as to get the ground firm and compact, it would help the grain to ripen earlier.

The question of rolling was then discussed. Some claimed the straw was very essential in some kinds of soil, but would be an injury on the other hand.

Among others who spoke was Mr. Doran. He agreed with Mr. Waugh's ideas in some particulars to a certain extent, but thought that the "advice and methods" of Mr. Waugh was above the means of the average farmer of Manitoba, and what was wanted was something practicable within the bounds of every farmer. Many agreed with Mr. Doran on this point.

Every one present seemed interested in the subjects and discussions, and many useful and feasible hints were made with in the comprehension of every farmer present.

DRAMATIC.

The Opera House Crowded Each Night.

The Brandon, Gray Imperial Stock Co., opened the new opera hall on Monday night last in a grand manner. The hall was filled and the performance given in the leading roll being particularly fancy.

On Tuesday night they presented in good style the opera of "The Girl of the Year". Miss Kate Delgish made a very pretty and successful debut, and the performance was most well received, and filled nearly every seat.

On Wednesday night Mr. Armstrong showed himself a promising young actor and one with great force of character. His stage presence was very good and his costume was excellent. The other parts were mostly well filled, and the performance was very good.

The company are to remain with us the balance of the week and we hope they will continue to have good houses.—They certainly deserve it.

Program.

A new feature has been added to the program of the concert on Thursday evening. Several members of the Brandon Gray dramatic company who have been giving such pleasing performances during the last three nights in the new opera house have very kindly consented to their services, and will put on a farce entitled "A Laugh Diamond". The cast of the piece is as follows:

Margery, Miss Kate Delgish.
Lady Faint, Miss Delgish.
Lord, Mr. Armstrong.
Mr. William Greengrass, Mr. Frank Armstrong.
Lord Faint, Mr. Frank Armstrong.

IT LEADS THE LEADERS.

The foremost medicine of the day, Borden's Blood Bitters, is a purely vegetable compound possessing perfect regulating powers over all the organs of the system and controlling their secretions. It purifies the blood that it cures all blood humors and diseases from a common pimples to the worst scrofulous sore, and this combined with its unrivalled regulating, cleansing and purifying influence on the secretions of the liver, kidneys, bowels and skin, render it unequalled as a cure for all diseases of the skin. From one to two bottles will cure boils, pimples, blotches, nettle rash, scurf, tetter, and all the simple forms of skin disease. From two to four bottles will cure salt rheum, eczema, shingles, erysipelas, ulcers, scrofulous, running sores, and all skin eruptions. It is noticeable that sufferers from skin diseases are nearly always aggravated by intolerable itching, but this quickly subsides on the removal of the disease by B. B. B. Passing on to graver yet prevalent diseases such as scrofulous swellings, humors and scrofula, we have undoubted proof that from three to six bottles used internally and by outward application (diluted if the skin is broken) to the affected parts, will effect a cure. The great mission of B. B. B. is to regulate the liver, kidneys, bowels and blood, to treat and remove without fail bad blood, liver complaint, biliousness, dyspepsia, sick headache, dropsy, rheumatism, and every species of disease arising from disorder of the liver, kidneys, stomach, bowels and blood. We guarantee every bottle of B. B. B. Should any person be dissatisfied after using the first bottle we will refund the money on application, personally or by letter. We will also be glad to send testimonials and information proving the effects of B. B. B. in the above named diseases on application to T. MILLER & Co., Toronto, Ont.

Happy Hamlets.
The Great Northwest Central
Makes a New Wheat Cen-
tre in Manitoba.

Hamlet, March 7.—The "ghost cities" of Manitoba will have to look to their hands if they wish to retain the ascendancy, as they have a formidable rival for the honors in this "baby city." On account of the rise in prices and the indication of an early break up in sleighing, farmers who have been holding their grain for a rise in price are now selling it at the rate of from 2,000 to 3,000 bushels a day. The farmers of the Hamlet are a well-to-do class and were in a position to hold their wheat when prices dropped, but now that the prices are improving and rising to get ahead of their supplies before a sudden drop, it makes a lively market. The prospect is that next fall Hamlet will be a notable wheat city. The country now tributary to Hamlet, formerly was the grain support of Virden, Oak Lake, Rapid City and Shell Lake. There are several ranches south of Hamlet, which are equal for wheat raising to any in the province, while to the north the country is unsuited for mixed farming. All things considered the prospects of Hamlet, becoming a thriving, prosperous town in the centre of a rich agricultural community are very good. It is hard to estimate the change which has taken place in the Hamlet and the prospects of the people tributary to the G.N.W.C. railway now that it is in operation. The management of this railway deserves credit for the manner in which they have run their trains on schedule time, hardly a hitch having taken place all winter. For a few years the record is hard to beat. The road to the postmaster-general is circulated last week and largely signed by the people of the town and surrounding country, praying that the mail should now be carried to Hamlet via the G.N.W.C. By three times a week. The mail service as it is now is very unsatisfactory to the business men of the place, there being only one mail each way per week. There can be no justifiable reason why the mail should not be carried to Hamlet by the railway especially when the train service has been so regular all through the winter.

Building operations will continue. The Messy Harris building is now well under way. Two more agricultural implements buildings will be built this month, by Densmore & Shaw, who are representing the Sylvester company, and the other by Jos. McLean, representing Johnston, Brandon. The Orangemen are building a hall this month. Ten dollars are being collected for a Presbyterian church and a number of other buildings will be commenced this month. The council of the municipality has granted an appropriation for a market scale, which are now being put in place. The council has also made a grant for the purpose of holding a spring fair. The Presbyterian people have given a series of concerts in aid of the building fund which have been immensely successful and a considerable sum realized for the building fund. The council has signified its willingness to grant a substantial bonus to any responsible man who will erect a first-class grain mill in Hamlet. There is a hotel being built and will be plastered just as soon as the weather permits.

HARTNEY.

Hartney will be to the front. This district has a wide spread name as the leading district in Manitoba for growing No. 1 hard, therefore we need not wonder at the many enquiries from outside parties that are interested in the production of the "golden." As to the supply of water and other necessities for this purpose, and as regards the supply and quality, Hartney can boast of having both quantity and quality second to no other town in the province.

From some correspondence that has been going on, last Monday's train brought the managers of a well-known Milling Co. to Hartney and they met a well-filled hall of the leading persons and business men of the district to discuss the subject of having a flour mill at Hartney. Shortly after 10 o'clock the chair was taken by J. Young who explained the object of the meeting and introduced Mr. Turner, manager of the Shaw Flour Milling Co., who at once came forward and explained the object of the meeting. Afterward many of our own residents gave their views on the subject and after a full discussion the following resolution was moved and carried unanimously: "That we do now offer to any responsible person or persons who will build a flour mill of latest improved machinery six capacity of one hundred and fifty bushels per day, the sum of five thousand dollars." This brought the large and representative meeting to a close.

What is becoming to come in more abundantly. Prices are equal to those paid at surrounding points with the exception of No. 1 and 2 hard; we believe that for the above named grades better prices are paid at Plum Creek. This is the best the farmers have seen at any time, so we may keep the ball rolling with you for the ham of a roller mill in Hartney.

As early as the Toronto papers the proven system of selling eggs is reported to the seller and the buyer. It is held that eggs vary so much in size that they bought by the dozen the purchaser does not always get full value, and it is suggested that if the eggs are sold by weight there would be uniformity in their efforts, and will be sold by weight. Considering the amount of money that the Canadian hen brings into the country every year—over a million and a quarter dollars—she does not receive very much consideration. Possibly the difficulty is in the size of the eggs, as they are accounted for by the theory that the hen is in doubt whether she is laying eggs for the market or the Yankee, and allows her sympathies to sway her in the pocket.
